

Melting Pot

The idea of a 'Melting Pot' is to provide an environment where new ideas can be advised and advanced, where scholars can report work in progress and invite others to share their seminal thinking, where scholars can discover others working in similar areas and with whom they may wish to commence collaboration, where public and private exchanges can occur as we all try to move forward in our thinking and experience.

The links to current research projects and development activities in progress are starting points for interested individuals or organisations to investigate further. Any additional contributions from the readership should be sent to the [Executive Editor e-JIST](#).
