ASCILITE 2020

ASCILITE's First Virtual Conference

ASCILITE 2020 – ASCILITE'S FIRST VIRTUAL CONFERENCE

The ASCILITE 2020 Conference is ASCILITE's 37th International Conference on Innovation, Practice and Research in the use of Educational Technologies in Tertiary Education. This year's conference was hosted by the University of New England, Armidale, virtually due to COVID-19, on 30 November to 1 December 2020.

Armidale is a city in the Northern Tablelands of NSW, Australia, with a population of around 25,000. It is approximately halfway between Sydney and Brisbane at the junction of the inland New England Highway and Waterfall Way to the coast. Armidale traditional owners are Anaiwan people with any Gumbaynggirr people settled in Armidale since colonisation.

Life in Armidale is peaceful, enjoyable and affordable. Set in the heart of the New England Tableland region of NSW, our primary campus is close to some of Australia's most stunning national parks with spectacular waterfalls and wildlife habitats. Attendees at ASCILITE 2021 will get to experience Armidale first hand.

ASCILITE 2020 themes:

1. **Transforming Assessment:** online examinations, innovations and transitioning to digital assessment, tools and techniques;
2. **Learning Analytics, Big Data and AI (Artificial Intelligence):** contemporary issues, intelligent tutoring systems, bringing analytics meaningfully to scale, ethics, future directions;
3. **Learning Design:** theory, methodologies and approaches, design for online, designing at scale; design patterns, hybrid learning, safety and privacy;
4. **Continuing Professional Learning:** frameworks, policy and practice, micro-credentialing, emerging themes;
5. **Next Generation Learning Environments:** mashups, virtual worlds; adaptive learning, personal learning environments, learning ecosystems;
6. **Student Success and Progression:** challenges of online learning, dealing with diversity, student advising models, the student journey in changing world;

Conference Organisation Committee

The University of New England ASCILITE 2020 Conference Organising Committee, led by Professors Sue Gregory and Steven Warburton, include Greg Dorian, Associate Professor Mitchell Parkes, Kathryn Tucknott, Alicia Zikan, Robyn Halloran, Mr Brent Gregory, Belinda Moore, Lee-Anne McKinnon, Liz Sozou, Julie Mills and Stephanie Toole.

Review Process

All Full and Concise papers submitted for the conference underwent a double-blind peer review process. A third blind peer review was conducted if opinions between the two reviewers was divided. This process allowed papers to be ranked and selected for inclusion in the conference. A further review was conducted by the ASCILITE 2020 Program Committee for papers just above and below the anticipated cut line.

A total of 89 submissions were received for the 2020 conference all of which were blind peer reviewed. The EasyChair Conference Management System was used for the submission and review process. An interesting and scholarly range of papers were received across the full range of conference themes. The 2020 ASCILITE Conference Organising Committee were more lenient on papers this year due to COVID-19. However, the overall quality of papers submitted were exceptional

ASCILITE's First Virtual Conference

Keynote Speaker

Shane Dawson

Professor Shane Dawson is the Executive Dean of Education Futures and Co-Director of the Centre for Change and Complexity in Learning (C3L) at the University of South Australia. Shane's research focuses on the application of learning analytics to inform learning design, educational technologies and overall teaching and learning quality. He has published widely on topics from creative capacity to social network analysis and more recently, on the application of complexity models in learning analytics.

His current research interests relate to complex systems and academic leadership to aid adoption and application of learning analytics at scale. With the support of many talented colleagues, Shane has been involved in the development of numerous open source software including the Online Video Annotations for Learning (OVAL) tool, OnTask (a personalised learner feedback tool), and SNAPP, a social network visualization tool designed for teaching staff to better understand, identify and evaluate student learning, engagement, academic performance and creative capacity.
